Notes on Data

- ▶ All figures have a citation in the bottom right with the url to the public data source provided by California Department of Education where the data is found as well as identifying what year the data represents.
- ▶ The most recent publicly available data is used.
- ▶ Different data sources identify racial groups differently. The axis labels use the terms used in that data source.
- ▶ Graphs with a vertical list of numbers represent the size of the total group from which the percentage for that bar is derived.

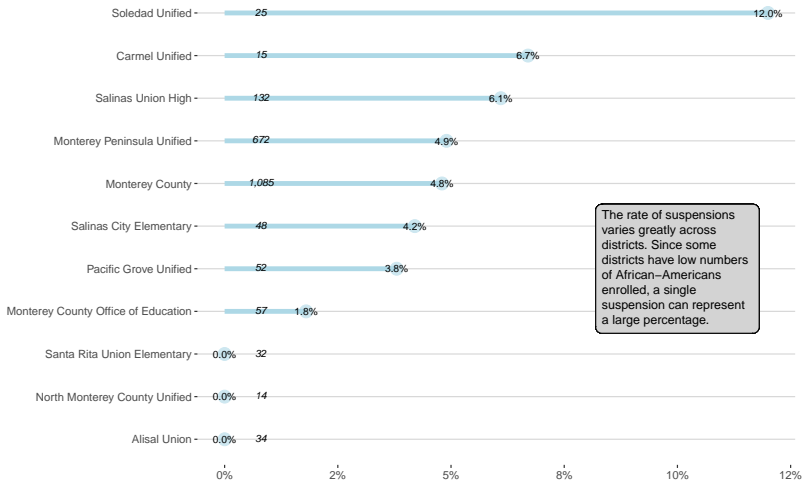

Suspensions

Monterey County Suspension Rates By Racial Group

Special Populations

Percent of Reported Homeless Students by District

The rates of homelessness and how different districts interpret McKinney-Vento laws varies greatly. This results in reported rates ranging from no homeless students to more than a third of students being reported as homeless.

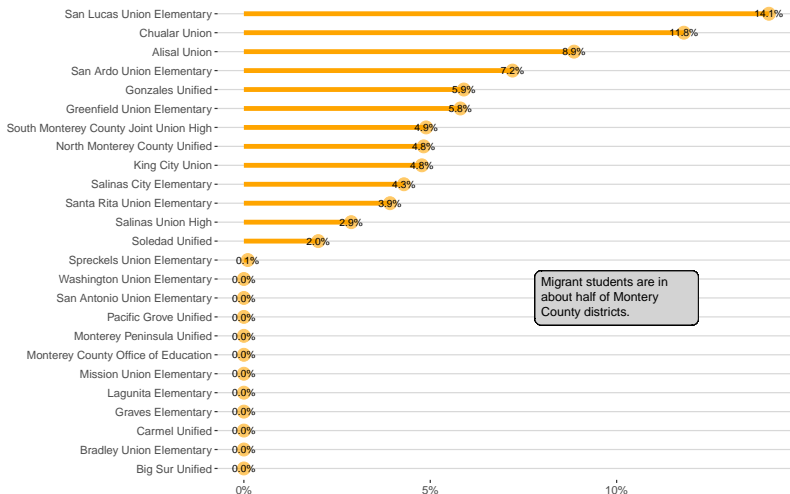

Reported Foster Students per Thousand by District

Foster students represents less than half a percent of students in all but one districts. Foster youth often need additional support in navigating school success.
